Key Investor Information
This document provides you with key investor information about this Fund. It is not marketing material. The information is required by law to help you understand the nature and the risks of investing in this Fund. You are advised to read it so you can make an informed decision about whether to invest.

Emerging Markets Targeted Value Fund
Share Class: GBP Accumulation Shares (ISIN: IE00B1W6DR00)
a sub fund of Dimensional Funds II plc.

Objectives & Investment Policy

The aim is to increase the value of your investment over the long term and to earn income within the Fund.
The Fund is managed on a discretionary basis and primarily invests in shares of smaller companies listed on the stock exchanges of emerging market countries as well as depositary receipts of these companies (financial certificates representing the shares of these companies and which are bought and sold globally). The Fund invests in the shares of smaller sized companies, using a value strategy meaning it invests in the shares of companies where, at the time of purchase, the Investment Manager believes that the share price is low compared to the accounting value of the company.

The composition of the Fund may be adjusted based on considerations such as the number of outstanding shares of public companies that are freely available to the investing public, the tendency of the price of a security/share to continue movement in a single direction, how readily available the shares are to buy and sell, and profitability.
The Fund may use financial contracts or instruments (derivatives) to manage risk, reduce costs or improve returns.

Risk and Reward Profile

The risk and reward category is calculated using historical data which may not be a reliable indicator of the Fund’s future risk profile.
The risk and reward category may shift over time and is not a target or a guarantee.
The lowest category (i.e. Category 1) does not mean a risk-free investment.
The Fund is in Category 6 because of the high range and frequency of price movements (volatility) of the underlying investments referenced by the Fund.

The following are additional risks not covered by the risk and reward category.
The Fund may invest up to 10% of its assets in other underlying funds. The Fund’s performance, costs and risks will be affected by the underlying funds. There can be no assurance that an underlying fund will achieve its investment objective.
The Fund may invest in smaller companies. This carries a higher risk as shares of small companies are often more difficult to sell than those of large companies, and as a result their share price can fluctuate more. In general, smaller companies are also more vulnerable than larger companies to adverse market conditions.

The Fund may seek to identify and invest in value shares, which are (in the Investment Manager’s view) shares, the prices of which are low compared to the accounting values of the companies issuing them. Value shares may perform differently from the market as a whole and following a value oriented investment strategy may cause the Fund, at times, to underperform funds that use other investment strategies.

Where the Fund uses futures or forward foreign currency contracts (derivatives), it may become exposed to certain investment risks including leverage, market, mismatching of exposure and/or counterparty risk, liquidity, interest rate, credit and management risks and the risk of improper valuation. While the Fund is not expected to have exposure to leverage to a material degree, any movement in the price of these investments can have a significant impact on the value of the Fund and the Fund could lose more than the amount invested.

More information in relation to risks in general may be found in the "Risk Factors" section of the prospectus.
Charges

The charges you pay are used to pay the costs of running the Fund, including the costs of marketing and distributing it. These charges reduce the potential growth of your investment.

The entry and exit charges shown are maximum figures. In some cases you might pay less, you can find this out from your financial adviser or distributor.

The ongoing charges figure shown here is an annualised estimate of the charges as there has been a reasonably significant difference to the last reported ongoing charges figure. The Fund's annual report for each financial year will include detail on the exact charges made. It excludes portfolio transaction costs and performance fees, if any.

More detailed charges information may be found in the “Fees and Expenses” section of the prospectus.

No conversion fee will be charged by the Fund or the investment manager.

Past Performance

Please be aware that past performance is not a reliable indicator of future results.

The fees for the ongoing Fund charges are included in the calculation of past performance. The entry/exit fees are excluded from the calculation of past performance.

The Fund was launched in 2007 and the share class was launched in 2007.

Past performance has been calculated in GBP.
